- Colors shown are approximate values using ProPoxy resin with a field dosage by volume of 8oz per mixed gallon and up to 16oz per mixed gallon with the following lighter colors: White, Ivory & Safety Yellow. ProThane & ProSpartic values will appear slightly lighter. For a more accurate value when specifying a particular system, it may be necessary to request a physical sample from **ProREZ** to verify color choice before installing.

- Color matching and custom colors are available. Please contact a **ProREZ** technical representative for more information.
